Academic Projects :

1.Project Title : Airline Reservation System

Technology : Java, HTML, and Database (MS SQL server).

Role : Design and Coding.

Description:

The Airline Reservation System project is an implementation of a general Airline Ticketing website like Orbitz, which helps the customers to search the availability of flights, book and cancel the flight tickets. This project also covers adding, deleting, or modifying the customer details and flights. In general, this website would be designed to perform like any other airline ticketing website available online.

2.Project Title : Mobile Shop Management System

Technology : Visual Basic v6.0 and database MS Access.

Role : Design and Coding.

Description:

This software can be used at reception counter, to maintain Mobile details, mobile sales, employee details, customer details etc... In manual system the process may take time and errors may occur. To overcome all the problems of manual system, we have designed this software Mobile Shop Management, to keep the accurate details do Member's and other details.
